

Agency Reports Related to Environmental Remediation

Introduction and Index

This section of the Archive for the Presidio of San Francisco Restoration Advisory Board, or RAB, contains selected documents that were prepared for or by the Presidio Trust, the California Regional Water Quality Control Board and California Department of Toxic Substances Control and studied by community members of the Presidio of San Francisco RAB. Some of the documents are cited in the Presidio RAB Final Report, which is also archived at this site. The documents here include the Trust's final reports in 2014 to the Water Board and DTSC on completion of the petroleum and hazardous substances programs, and the Water Board's and DTSC's certifications of fulfillment of those programs. (Note: additional agency documents have been archived elsewhere at the Internet Archive by other parties and can be found with search terms such as Presidio environmental remediation.)
